Crisafa Naufal Rachmawan, 2025. Pengaruh Keteladanan Orang Tua Terhadap Akhlak Anak Di Madrasah Diniyah Assalam Karangwungu, Balongpanggang, Gresi. Prodi Pendidikan Agama Islam Fakultas Agama Islam Universitas Darul 'Ulum Jombang.

Anak merupakan anggota keluarga yang harus diperhatikan perkembangannya sedini mungkin termasuk dalam hal perilaku atau akhlaknya. Pola pendidikan akhlak bagi anak ditujukan untuk kehidupan yang bermanfaat. Pendidikan akhlak wajib dimulai dari lingkungan keluarga dengan diberi bimbingan serta teladan atau contoh yang benar agar anak-anak terbiasa dengan kebiasaan yang baik. Penelitian ini bertujuan untuk mengetahui pengaruh keteladanan orang tua terhadap akhlak anak di Madrasah Diniyah Assalam Karangwungu, Balongpanggang, Gresik.

Penelitian ini merupakan penelitian kuantitatif dengan pendekatan korelatif. Populasi penelitian ini seluruh santri Madrasah Assalam Gresik kelas wustho dan awwaliyah sebanyak 117 santri, yang kemudian diambil sampel sebanyak 30 santri. Metode pengumpulan datanya dengan metode observasi, angket, dan dokumentasi. Sedangkan analisis datanya menggunakan metode statistik dengan rumus korelasi product moment.

Hasil penelitian ini menunjukkan bahwa berdasarkan analisis korelasi product moment bahwa keteladanan orang tua mempunyai tingkat korelasi terhadap pembentukan akhlak anak dengan indeks korelasi (r_{xy}) = 0,591 dan hasil tersebut dapat diinterpretasikan pada taraf signifikan 5% = 0,3610 dan sedangkan pada taraf 1% = 0,4629. Sehingga dapat diketahui bahwa r_{xy} lebih besar dari taraf signifikan, maka H_a diterima dan H_o ditolak. Hal ini berarti ada pengaruh yang positif antara keteladanan orang tua terhadap pembentukan akhlak anak/santri di Madrasah Diniyah Assalam Gresik, dengan pengaruh yang bersifat sedang/cukup.

Kata Kunci : Keteladanan ; Orang Tua ; Akhlak ; Anak/Santri

THE INFLUENCE OF PARENTS' EXEMPLARY BEHAVIOR ON THE FORMATION OF CHILDREN'S MORALITY AT MADRASAH DINIYAH ASSALAM KARANGWUNGU BALONGPANGGANG GRESIK

Crisafa Naufal Rachmawan, 2025. *The Influence of Parents' Exemplary Behavior on the Morality of Children at Madrasah Diniyah Assalam Karangwungu, Balongpanggang, Gresik.* Department of Islamic Education, Faculty of Islamic Studies, Universitas Darul 'Ulum Jombang.

Children are family members whose development must be given proper attention from an early age, particularly in terms of their behavior and morality. Moral education for children is directed toward building a meaningful life. Such education must begin within the family environment through proper guidance and exemplary models so that children become accustomed to good habits. This research aims to determine the influence of parents' exemplary behavior on the morality of children at Madrasah Diniyah Assalam Karangwungu, Balongpanggang, Gresik.

This study employed a quantitative research method with a correlational approach. The research population consisted of all 117 students of Madrasah Assalam Gresik at the *wustho* and *awwaliah* levels, from which a sample of 30 students was taken. Data collection techniques included observation, questionnaires, and documentation. The data were analyzed statistically using the product moment correlation formula.

The results show that based on the product moment correlation analysis, parents' exemplary behavior has a correlation with the formation of children's morality, with a correlation index (r_{xy}) = 0.591. This result, when interpreted at the 5% significance level (0.3610) and the 1% significance level (0.4629), indicates that r_{xy} is greater than both significance thresholds. Therefore, H_a is accepted, and H_o is rejected. This means that there is a positive influence between parents' exemplary behavior and the formation of children's morality at Madrasah Diniyah Assalam Gresik, with the influence categorized as moderate.
