ABSTRACT

Disaster is an inevitability that can occur at an unpredictable time and can happen to anyone. Disasters are a mystery in human life and livelihood, actions that can be taken are related to efforts to reduce the risk of disaster victims.

In handling disasters in Indonesia, cooperation has been built with many countries, one of which is the United States. The governments of the United States and Indonesia have agreed to continue to build cooperation in the field of disaster management. From this research, we want to know the participation of the United States, represented by USAID-APIK, in participating in efforts to deal with disasters in Jombang district and the results of the research show that USAID-APIK participation in disaster management in Jombang.

Keywords: Jombang Disaster Resilient Village, Jombang and the United States, Usaid-Apik.
