

ABSTRACT

Yuni Maharani, 192360201004, 2023. "Analysis of the use of organic waste for duck livestock feed in an effort to improve the community's economy".

The source of organik waste comes from household waste, agricultural waste, and leaves around us. Bebel breeders through the manufacture of appropriate alternative feed can reduce the level of dependence of duck breeders on the use of factory-made feed.

This type of research is field research, the nature of the research is a qualitative description. As for the method of data collection by using the method of observation, interviews, and documentation.

From this study, breeders made a change so that the economy could survive during the pandemic by bringing about a change in the habit of dependency on using factory feed by using organik waste as an alternative feedso that they can minimize costs. Besides that, alternatively making feed can increase the livestock harvest period to 40 days so that the economic system of duck breeders is increasing.

Keywords: *Organic Waste, Alternative Feed, Economic Improvement*
